Education

Thapar Institute of Engineering and Technology CGPA - 7.97
Bachelor of Engineering in Computer Science *Sep 2022 - May 2026*

Coursework

Courses: Object-Oriented Programming Systems (OOPS), Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Artificial Intelligence (AI), Machine Learning (ML), Operating Systems (OS), Computer Networks (CN), Computer Architecture and Organization(CAO), Software Engineering, Data Science.

Experience

Backend Development Intern Sep 2024 – Nov 2024
To-Let Globe

- Built scalable backend services with Node.js, Express, and MongoDB to manage property listings and searches.
- Implemented filter APIs for location, price, and features, enabling users to find relevant rentals faster.
- Engineered property upload endpoints with server-side validation to ensure accurate home listings.

Software Development Intern Jun 2024 – Jul 2024
SoGrow *Chandigarh*

- Developed RESTful APIs in Node.js and Express to support CRUD operations for student/teacher modules, servicing 20+ schools and 10,000+ students.
- Collaborated with React frontend team to integrate APIs, boosting user satisfaction and UX consistency.
- Utilized Git for version control, streamlining code management and fostering seamless collaboration within the team.

Projects

EaseEvents | *Node.js, Express.js, MongoDB, EJS* *Live Demo*

- Conceptualized and launched a platform connecting users with event-related providers across 5–6 categories, enabling seamless booking and management.
- Implemented user-side features to browse, filter, and book service providers based on criteria like cost, location, and rating.
- Integrated Cloudinary for image upload and fetching, enabling providers to manage event photos seamlessly.

SockeTrack | *Socket.io, Node.js* *Live Demo*

- Built a real-time location tracking app using Socket.io, enabling two or more users to share live positions within a shared network.
- Engineered a scalable Node.js backend to manage multiple concurrent shared networks for real-time updates.
- Integrated live map markers in a responsive interface to ensure an engaging user experience.

Emotion Detector | *Python, Machine Learning* *Source Code*

- Developed a system to classify emotions (e.g. joy, anger, sadness) from text achieving over 85% accuracy.
- Used a Kaggle dataset with 16,000 training samples labeled across 6 emotions.
- Trained and evaluated multiple models such as Logistic Regression, Random Forest and SVM.

Technical Skills

Languages: C/C++, SQL, HTML/CSS, JavaScript, R, Python
Frameworks: React, Node.js ,Express.js
Developer Tools:VS Code, Postman, Git, RStudio, Jupyter Notebook, Kaggle
Databases: MongoDB, PostgreSQL, MySQL
Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Achievements and Extracurriculars

- Solved over 450 Data Structures and Algorithms problems on LeetCode - *Udit0808*
- Rated 3 star on CodeChef - *Udit0808*; secured Global Rank 246 in CodeChef Starters 160.
- Secured a Top 50 rank among 7000+ participants in the Zelestra X AWS ML Ascend Challenge — 2nd Edition.
- Executive member of Thapar's oldest tech society - Creative Computing Society(CCS).
